Five Observations

- Expanded visions of access— beyond enrolments, MDGs and 2015
- Learning from the past, changing patterns and political economy
- Equity, distribution, disaggregation and growth in access
- Measuring, monitoring, targeting and transparency
- Global recession, vulnerability, public investment, aid

GOLD COAST

Projecting the Future

GROWTH OF PERCENTAGE OF SCHOOL-AGE POPULATION
ACTUALLY ENROLLED IN GOVT. & AIDED SCHOOLS 1911 - 1934.

CREATE Zones of Exclusion

CREATE Zones of Exclusion

Zone 0 - excluded from pre-schooling

Zone 1 - never been and are unlikely to go to school

Zone 2 - entered primary and dropped out

Zone 3 – entered primary - at risk because of poor attendance/ achievement/ health, repetition, overage, silent exclusion

Zone 4 – failed to make the transition to secondary school

Zone 5 - entered secondary and dropped out

Zone 6 - entered secondary - at risk because of poor attendance/ achievement/ health, repetition, overage, silent exclusion

Zone Chart

Expanded Visions of Access to Basic Education

- Sustained attendance not just enrolment (learning time)
- On-schedule progression at appropriate ages
- Meaningful learning and appropriate achievement levels
- Adequate health and nutrition
- Appropriate learning environment
 - pedagogy / curriculum / teachers / facilities
- Reasonable access to subsequent levels of education
- More equity + less variation in quantity and quality of inputs
- Differentiated indicators at different levels of analysis

$$\text{Access} = Att + Age + Ach + Hn + Le (p + c + t + lf) + \dots$$

Attendance and Silent Exclusion

Attendance – Case Study School

Grade 1 6-12 Years

Age in Grade and Silent Exclusion

Enrolment by Grade and Age – India

One Class School – 4 – 14 Years

Enrolments by Grade Sub-Saharan Africa

Enrolments over Time - India by State

Enrolment by Year and Grade – Uganda 1985-2005

Achievement and Silent Exclusion

Ex White and Ex African School Performance - A Province in South Africa

Skewed Achievement Patterns

Enrolments by Grade, Wealth and Gender

Trouble with GERs and NERs

Some Key Messages

Silent exclusion – attendance, age in grade, achievement, migration, disability, social exclusion

Drop out/drop in – crossing thresholds, locus of responsibility

Health and nutrition – stunting, cognitive disadvantage

Multigrade and small schools – positive pedagogy and size

Financing – efficiency, effectiveness austerity

Non state providers – role of State, limits to growth

Inequality – poverty, gender, location, health status, distribution

Improving monitoring and targeting – GERs, NERs, GPIs, survival rates et al

Political economy of EFA and drivers of changing patterns of access – balanced + sustainable growth, demography, recession

The Future or the Past?

Inclusion

Exclusion

Measuring, Monitoring, and Targeting

- Purpose: measuring, monitoring, or targeting
- Level of analysis – international.... school
- Validity – constructs and confidence
- Reliability – error margins and change over time
- Sensitivity – relationship between inputs and outputs
- Feasibility – costs and benefits
- Disaggregation – distribution and dispersion
- Analysis and Reporting – interpretation and use

Enrolment by Age, Household Income and Sex India

Groups from an index of assets/house characteristics
Based on analysis of data from DHS
econ.worldbank.org/projects/edattain

Based on analysis of data from DHS
econ.worldbank.org/projects/edattain

Enrolment by Year and Grade Tanzania 1970-2005

Enrolment by Grade and Age – Case Study District

Indicators and Targets

**NER and GER by cycle or grade specific participation rates –
Ratio NER Grade 1 + NER Grade 5?**

**Completion rates to grade 5 – or “System Yield” – Numbers
passing Primary School Leaving Certificate as % of age
group (age corrected?)**

**Literacy and numeracy rates for 15 year olds HH – test based
on sample?**

**Gender Participation Index or simple ratio of male and female
enrolments in grade (- repeaters? Corrected for age?)**

**Enrolments in grade 1 5 and 9 by Household income quintile
as % of children in quintile**

Attendance Rates and Learning Opportunity time

Age in grade variance

Indicators and Targets

Distributional measures at different levels of:

- **Variance in Pupil Teacher Ratios and Class Sizes**
 - **Teacher per Class Ratio**
 - **Qualified teacher ratio (maths/language/science)**
 - **Class size**
 - **Children per well-found Classroom**
 - **Textbook/ child**
 - **Transition Rates (beware)**
 - **Scores and variance in scores on monitoring assessments**
- Costs per child by institution and level etc**

Profiling Exclusion

Demand

Supply

**Individual
characteristics
and agency**

**School quality,
process and outcomes**

**Meaningful
Equitable
Access**

**Household
Characteristics
and Agency**

**Community
social, economic,
and political**

**District educational
governance
and resources**

**Equity
Distribution**

**Mobility
Poverty Reduction**

**Transitions
Growth**

Better Indicators? - GERs and NERs

A Supply Side Constraint?

Enrolment by Grade and Age – Sub-Saharan Africa

Enrolments over Time - India

Kenya Age Grade Profile Kenya

Kenya Enrolments and School Age Population

Figure 4.1. Kenya: Age 6 Population Estimates, Grade 1 intakes and Grade 5 survivors, 1964 to 2003

Changing Patterns of Enrolment and Balanced Investment?

Age and Enrolment

Indicators and Targets

Distributional measures at different levels of:

- **Variance in Pupil Teacher Ratios and Class Sizes**
 - **Teacher per Class Ratio**
 - **Qualified teacher ratio (maths/language/science)**
 - **Class size**
 - **Children per well-found Classroom**
 - **Textbook/ child**
 - **Transition Rates (beware)**
 - **Scores and variance in scores on monitoring assessments**
- Costs per child by institution and level etc**
