

Education decisions in slums of Dhaka

Stuart Cameron

UKFIET Oxford Conference

September 2009

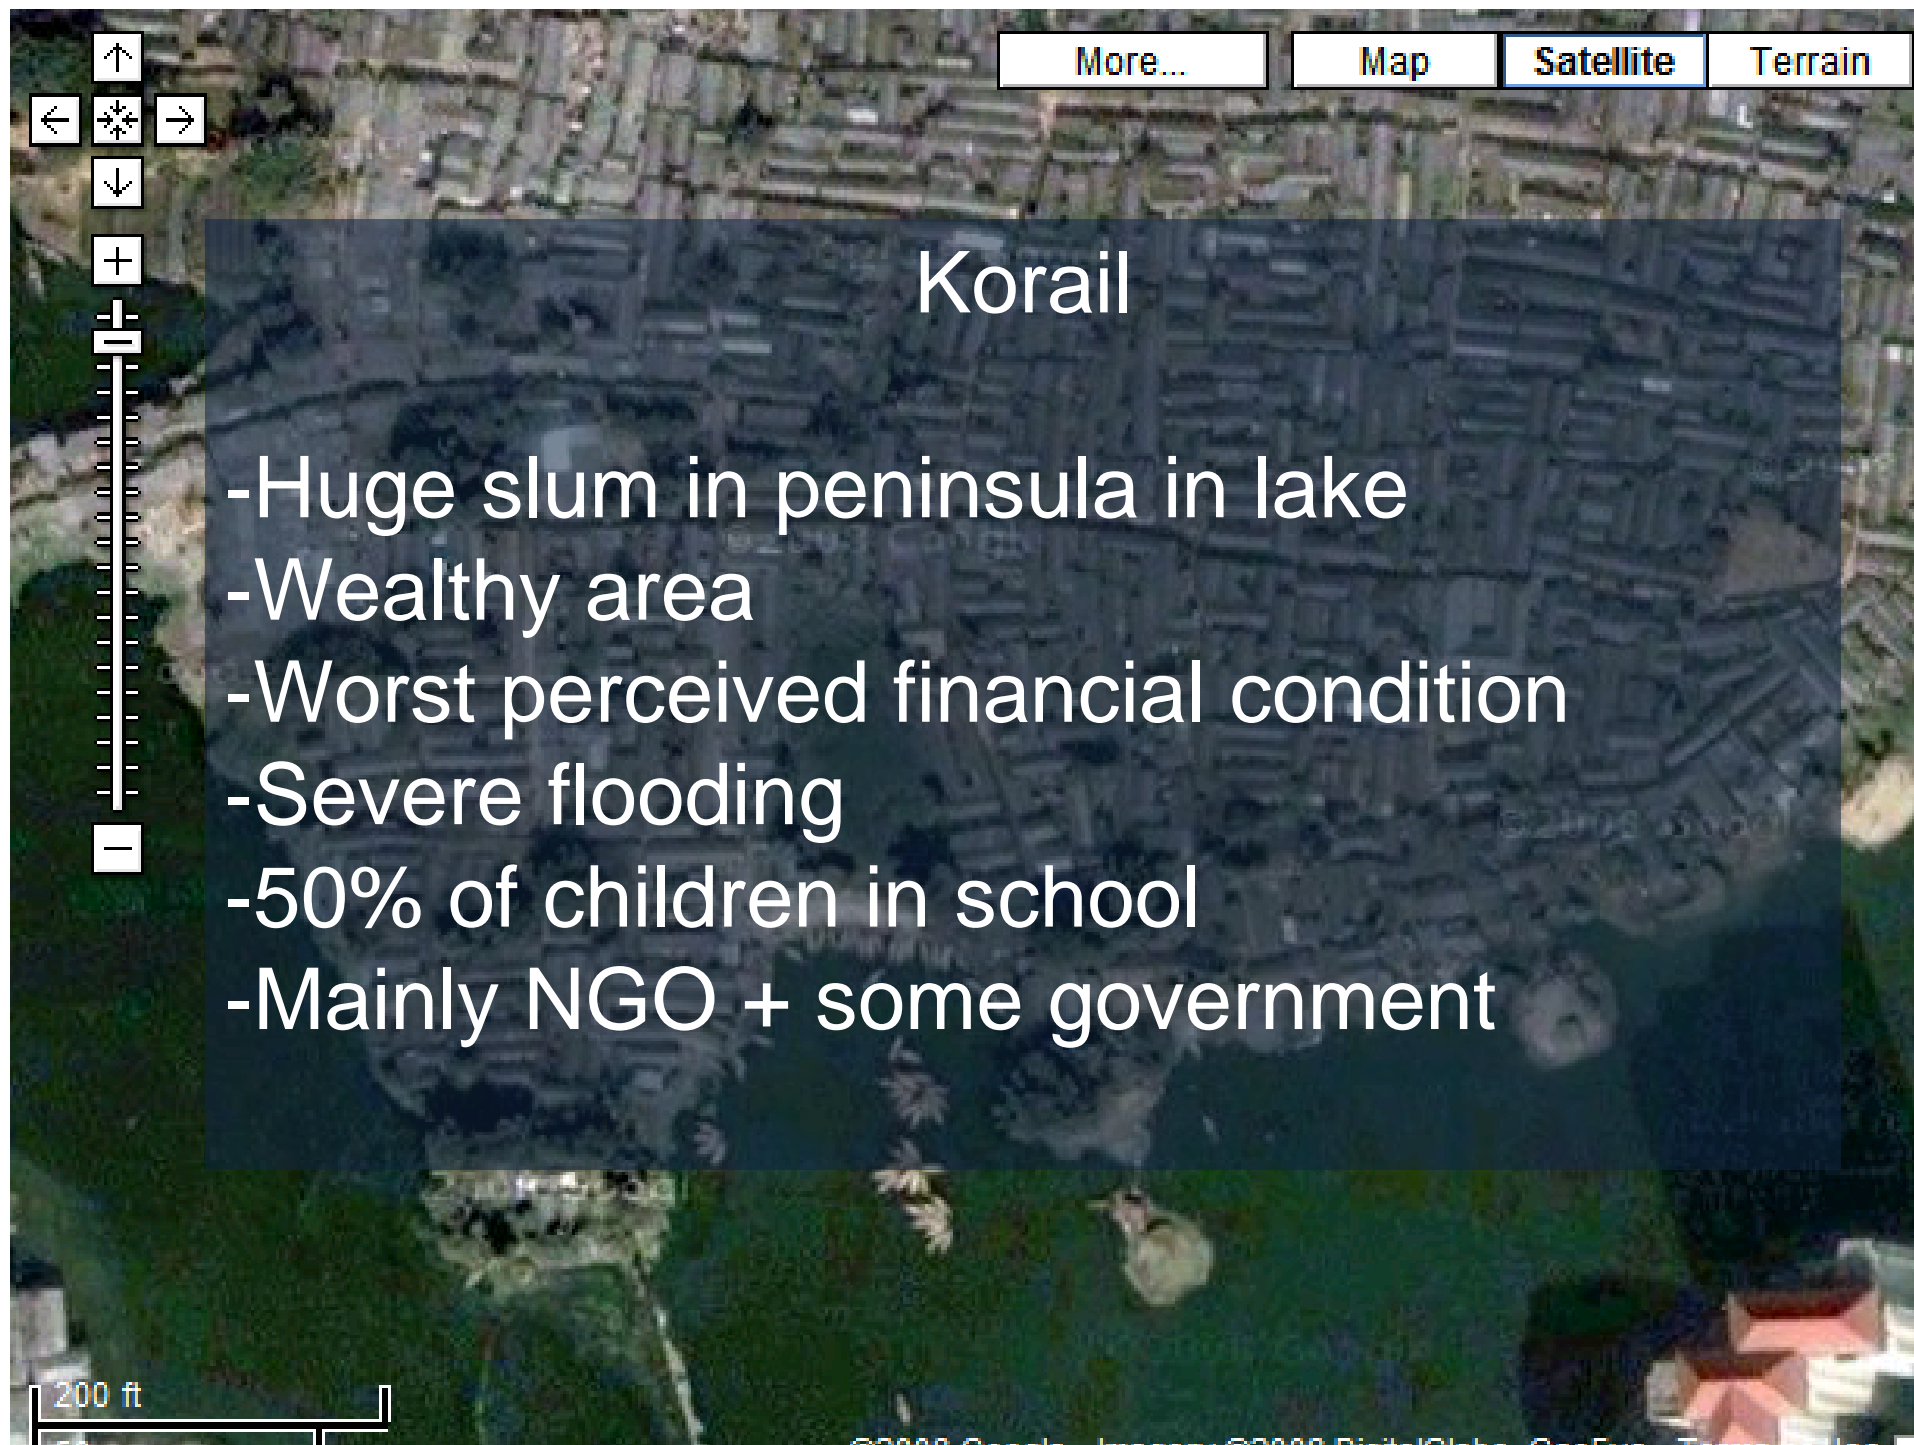

Context

- Rapid urban economic growth, poverty reduction, migration
- High and increasing returns to education
- But much of the migration is towards slums
 - 1 in 3 of Dhaka's population
 - Very low income, poor housing conditions
 - Children often work
 - Unrecognised
 - Not enough schools
 - Harder to access returns to education

The research

- CREATE survey – 1600 households in 4 slums (plus 6 rural areas)
- My survey – 500 of these households / 600 children aged 11-15
- Interviews – 30 households

Map

Satellite

Terrain

Korail

- Huge slum in peninsula in lake
- Wealthy area
- Worst perceived financial condition
- Severe flooding
- 50% of children in school
- Mainly NGO + some government

200 ft

Tejgaon

- 120 rooms on three floors
- highest rents
- highest income
- half of children in school
- mainly government schools
- fewest friends and relatives
- migrated from diverse origins

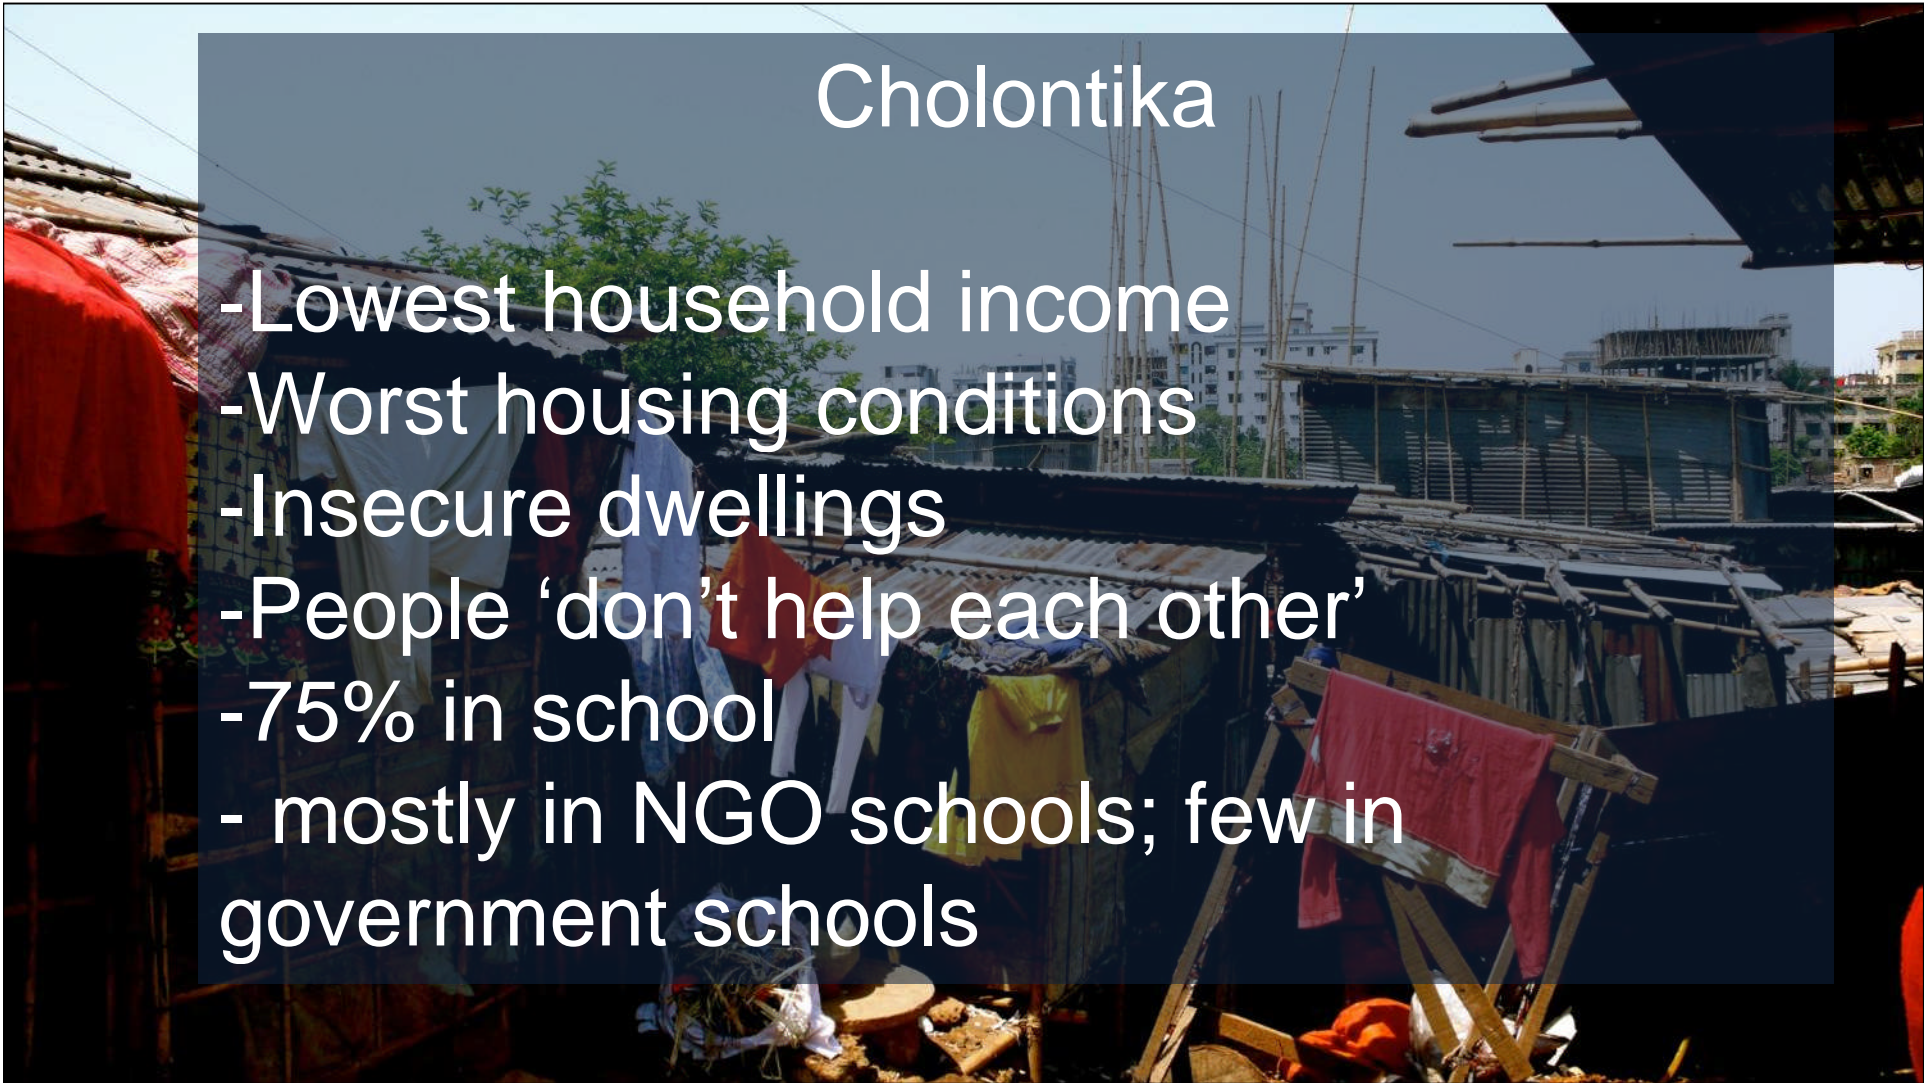

Lalbag

- Sweeper colony in Old Dhaka
- Mostly born in Dhaka
- Highest enrolment: >80%
- >50% in government schools
- 17% in private schools

Cholontika

- Lowest household income
- Worst housing conditions
- Insecure dwellings
- People 'don't help each other'
- 75% in school
- mostly in NGO schools; few in government schools

Proportion of schoolgoing children by age and sex

School type

* Includes registered non-government primary schools
